

NEFF Product Pairings

Some things in life are just better in pairs. Cheese and dried fruit, chilli and chocolate, fish and chips. But what about kitchen appliances?

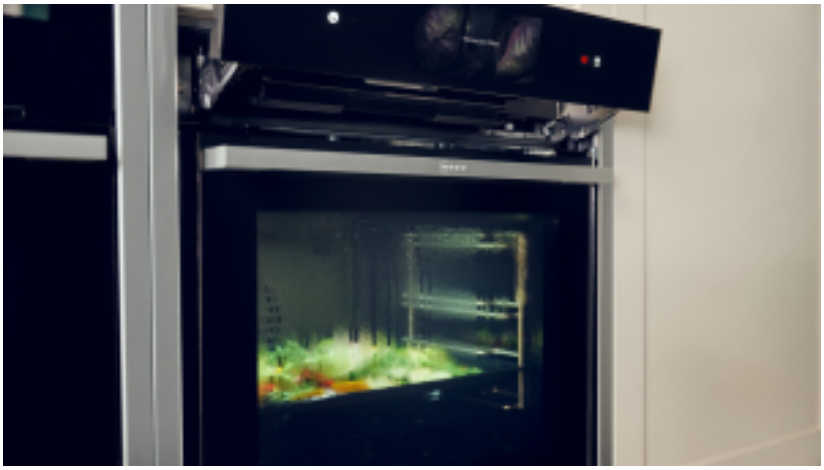

When it comes to **kitchen appliances**, it all comes down to your personal cooking style and what you need. The good news is that NEFF appliances have endless combinations to suit an array of home cooks. We're going to explore these combinations and why they work so well. Let's dive right in.

1. Slide & Hide® and combination microwave oven

The NEFF **Slide & Hide® oven** features our customer-favourite disappearing door that helps you save space and avoid accidents in the kitchen. When paired with a **combination microwave oven**, you'll also have the option to heat up leftovers or whip up quick meals without having to fire up the entire system.

One of the great things about this fuss-free pairing is that it's available in the **NEFF Flex Design range**. This means that you can have a **seamless combination** with the two appliances, as they can have matching trims and handles for a holistic kitchen style.

2. Non steam oven with an Added Steam oven (side by side)

Want to enhance your cooking? Then this appliance combination is for you.

A **NEFF oven**, equipped with features like **Circo Therm®** and Air Fry, lets you whip up crispy, perfectly cooked dishes effortlessly. From roasting vegetables to baking pastries, this oven delivers consistent and delicious results every time.

The **Added Steam oven** allows you to experiment with steam-based cooking, such as baking **sourdough bread**, **carrot cake cinnamon scrolls**, or **Asian braised chicken**. Adding steam to your dishes can help them become succulent and moist without going soggy or losing their crispiness. You can also match the colours of your two appliances thanks to the **Flex Design range**. Seamless style paired with cooking convenience? Now that's a combination worth investing in.

3. Warming drawer and Slide & Hide® oven

No kitchen is complete without a **warming drawer**. This handy appliance is perfect for those who love to entertain, as you can use your warming drawer to keep food toasty for the main course or leave plates to warm up while you cook.

What's even better is that the range of warming drawers in the NEFF Flex Design range are designed for seamless installation with your **Slide & Hide® oven** from the same collection. Simply choose one of four colours and voila – the pair will look like one well-engineered machine.

4. Vented Flex Induction cooktop and griddle plate

Our **vented cooktop model** is already a 2-in-1 appliance itself, as it's a combination of a cooktop and rangehood in the one appliance. With a range of smart, intuitive features for cooking and an **easy-to-clean surface**, this appliance will take your stovetop experience to the next level. But one thing the cooktop can't do is griddle your meats and veggies to perfection. Enter, the **griddle plate.**

Designed to sit seamlessly on top of your cooktop, the NEFF griddle plate transfers heat from the induction surface and transforms your bench into a grilling station.

5. The Double Oven

As the saying goes, two is always better than one. If you've got a large family or like to entertain guests often, then it's a smart idea to invest in a **double oven**. With two ovens stacked seamlessly on top of each, the world is your oyster when it comes to cooking options.

If you're looking to combine your ovens, then explore the **Flex Design range** to discover endless combinations for seamless oven integration.

Want to see these combinations in person? Then book in a **free product demonstration** with our NEFF experts. They will show you the different combinations that are available and how you can incorporate them into your kitchen.

About NEFF
