

## NEFF Product Pairings

When it comes to appliances, two is sometimes better than one. Our NEFF experts explain the best NEFF product pairings and how appliances can work together for an even better cooking experience.

Cheese and wine, fig and balsamic, chilli and chocolate, lemon and garlic.

There's no denying that some of the best things in life come in pairs. A perfectly balanced combination can often create an even better outcome – in food, and in appliances.

One expertly engineered oven or utensil can go a long way in elevating your home cooking experience, but it's often the combination of a core appliance with the perfect add-on, or two diverse basics, that really take the cake.

Whether you're planning a kitchen renovation, or simply looking to expand your appliance range, the NEFF experts have curated a list of our perfect product pairings – from what goes best with your Slide&Hide oven, to how a Griddle Plate is the perfect accompaniment to your Cooktop.

### 1. Slide&Hide oven & Built-In Microwave

Our Choice-recommended Pyrolytic [Slide&Hide](#) oven features our customer-favourite disappearing door that helps you save space and avoid accidents in the kitchen.

But with a [Built-In Microwave Oven](#) added to the mix, you'll also have the option to heat up leftovers or whip up quick meals without having to fire up the entire system. Our Compact Oven with Microwave function is a great addition to any kitchen, and makes every day cooking that little bit more convenient.

It's the dream duo for fuss-free cooking.

## 2. FullSteam Oven plus Built-in Microwave

For passionate cooks who want all the basic ingredients, plus all the bells and whistles, this combination is for you.

If you choose a Slide&Hide oven with FullSteam, you'll have access to both conventional and steam functions depending on what you're cooking. FullSteam allows you to create healthier, succulent dishes with intense flavour. And then you'll be able to warm them up again in your perfectly-paired microwave oven...

Usually integrated seamlessly into your upper cabinetry, a built-in microwave is the perfect product pairing for busy home chefs. This [Pyrolytic Microwave](#) also comes with a range of added features, from pyrolytic self-cleaning functions to CircoTherm for even baking results.

## 3. Warming Drawer and Slide&Hide Oven

No oven is complete without a [Warming Drawer](#), where you can keep food toasty for the main course, or leave plates to warm up while you cook.

What's even better is that the range of warming drawers at NEFF are all designed for seamless installation with your Slide&Hide oven, so the pair will look like one well-engineered machine.

## 4. Vented FlexInduction Cooktop and Griddle Plate

Our [vented cooktop model](#) is already a kind of 2-in-1 in itself, with both cooktop and rangehood features built in. One of these will transform your stovetop cooking experience, with a range of smart features and easy-to-clean surfaces. But one thing the cooktop can't do is griddle your meats and veggies to perfection... which is where the [Griddle Plate](#) comes in.

Designed to sit seamlessly on top of your cooktop, the griddle plate transfers heat from the induction surface and transforms your bench into a grilling station.

## 5. The classic Double Oven

Two is always better than one. If you've got a large family, or like to entertain guests often, you will want to invest in a [double-oven](#) at some point. The two ovens stacked on top of each other provide an infinite array of cooking options, and space to cook an entire feast.

Hot tip: If you're looking to combine your ovens, be sure to explore our unique NEFF [combination strips](#) to integrate the two appliances seamlessly.

If you could use a helping hand deciding which pairings are perfect for your kitchen, and how to integrate them right, [book a consult](#) with one of our friendly NEFF experts for more information.
