COOKING PASSION SINCE 1877

Your ultimate guide to buying a new kitchen appliance

Quality appliances can rapidly transform your kitchen into a functional and beautiful space.

Choosing appliances for your kitchen can feel a little overwhelming. It's a place where we spend most of our time each day, so investing in the best is important for longevity.

That's why we're going to break down some of the essential NEFF appliances you can add to your kitchen to help you feel confident in your decision.

Choosing an oven

Your **oven** is going to be one of the most-used appliances in the kitchen. It's where you can whip up a **perfect Sunday roast** or bake a **super moist chocolate cake**, so quality and oven functions are important.

The new **NEFF Flex Design range** includes all the features you know and love, with a twist. You have endless combinations to customise your oven arrangement to suit your personal style and cooking. For example, if you host a lot of events or have a big family, then you might stack two ovens next to each other – a **Full Steam oven** and a **Slide & Hide® oven** – to make the most of your kitchen's space and give you ample cooking room. Or you might invest in a **combination oven** if you want a two-in-one solution to save precious bench space.

Selecting a cooktop

No matter if your cooking **sweet potato gnocchi** or a hearty **roasted pork and fennel meatball soup**, a cooktop is an essential part of the kitchen. As part of the **NEFF Flex Design range**, you can match the trimmings and handles of your cooktop with your NEFF oven for a seamless kitchen design. **The Twist Pad Flex** dial will not only make your induction cooking a breeze, but you can use move the dial from your cooktop to your oven for effortless cooking.

A **NEFF induction cooktop** intuitively supports your cooking, as the technology can immediately recognise the size, shape and position of your pots and pans. This can give you a perfect cook on your dishes without having to constantly adjust your settings.

Getting the right rangehood

Another essential in any kitchen is a **rangehood.** Not only can they remove unwanted odours from the kitchen, but they can also add a modern touch to your kitchen's style. The **NEFF canopy or inclined rangehood** in the Flex Design range comes with coloured trims that can match the rest of your NEFF kitchen while also being easy to control – simple set your fan level and adjust the hood's lighting via your cooktop. With the efficient drive motor, you won't hear a thing from your rangehood, allowing you to focus on meaningful conversations around the kitchen.

Dishwasher

Your **dishwasher** is your post-feast hero, so it's important that you invest in a quality appliance that can handle anything. There are three types of **NEFF dishwashers** you can consider: fully integrated, semi-integrated, and built-under.

All NEFF dishwashers have the same functions to ensure your dishes are cleaned quickly and silently, even though there are clear aesthetic differences. Fully integrated dishwashers are concealed behind your cabinetry and the controls are displayed when you open the dishwasher. Semi-integrated dishwashers, meanwhile, match your cabinetry while having a visible, external control panel. Lastly, built-under dishwashers are a cost-effective dishwasher solution for those who don't mind the silver appearance.
