Incorporating a double oven in your kitchen reno may sound like a needless extravagance to some, but the truth is having two ovens in your kitchen has a whole host of benefits – from flexibility to space-saving, explore all the advantages below.

Double ovens are great for entertaining

If you are someone who loves to have friends over for a Friday night home-cooked banquet, then a double oven would serve you well. A NEFF double wall oven allows you to cook different meals at the same time, meaning you can have your mouth-watering [Apple Kuchen Tart](#) baking while your roast beef cooks away. Two ovens also mean double the racks, so if you're cooking for a crowd of 20+ all your appetizers can cook at the same time. Find out how hassle-free double ovens really are from a NEFF customer:

"Best Oven I've Ever Had – I research everything I buy. Everything these days upon inspection seems cheaply made, what a breath of fresh air the NEFF double oven was. At the forefront of modern oven technology for the average Joe like me. So much room in the lower oven, perfect for entertaining cooking for many guests and having the versatility of 2 cooking spaces. Whisper quiet and so easy to clean with using horrid chemicals."

NEFF double ovens also come with [Pyrolytic Self-Cleaning](#), meaning you never have to worry about big spills getting baked in. This function allows you to wipe any mess away after your oven has cooled down.

Allergy friendly: Great for those with food intolerances

One of the other great advantages of double ovens? People with food allergies have the ability to cook their own allergy-sensitive dishes in a

separate oven to the rest of the family, ensuring there's no transfer of ingredients between foods. In fact, valued NEFF customer Janine – whose son suffers from Coeliac Disease – swears by her NEFF double oven when cooking dishes for her family.

“It's such a relief to be able to pop my son's gluten-free meals in the smaller top oven and the rest of the family's meal in the larger main oven. Macaroni cheese is a firm favourite with my crew, which used to stress me out because it contains gluten and I worried there might be contamination between dishes when I put both in one oven. My NEFF double oven means I can relax and enjoy a lovely meal with my family – even though we're eating completely different dishes.”
