

Do you need more than one oven?

Tossing up whether you need one oven or two ovens? We have the guide for you.

When planning your dream kitchen, you really have the opportunity to set yourself up for both your nightly cooking needs as well as those big life events – especially when it comes to deciding on how many ovens to purchase.

So whether you're cooking for an army, like to entertain or more of a solo chef, we can help you find an oven solution that is right for you.

We know that this can be a confusing topic, so we're going to help you understand if a single oven will do the job for you or if you'll benefit from having more than one.

Why you'd need multiple ovens

For those who want to be able to feed a crowd, we have many customers these days seeking out multiple ovens for their cooking requirements. The obvious benefit of having two ovens is having **double the cooking capacity** – great if you have loads of guests over or a big family.

You can also have **two really different meals on the go at the same time**. So you can prepare your mouth watering crispy potatoes on high heat in one oven, while your lamb slow-cooks away to perfection in the other.

If you're cooking for **someone with allergies**, having separate ovens also helps you avoid cross-contamination between dishes.

And you get the **added benefit of choosing what kind of features your additional oven might have**. Maybe that's an oven that doubles as a microwave. Or, my second oven has steam functionality which gives me a whole new way of cooking, plus I don't need a separate steamer.

If you are choosing to purchase more than one oven you have the option to stack them on top of each other or have them side-by-side.

In simple terms, you fall into one of the below groups – we’d highly suggest you consider multiple ovens:

- You have a large family & need a large cooking capacity
- You love entertaining & cook different meals at once
- You cook for people with allergies
- You’d like additional cooking functions

A single NEFF oven with CircoTherm®

If you don’t have the space or you feel like your family set up doesn’t need it, then NEFF has a range of single ovens that pack multiple features into one oven.

Thanks to the power of the [CircoTherm®](#) fan system, you can cook different dishes on multiple levels and the cooking technology ensures there is an even distribution of heat so everything will cook evenly.

Plus, we have single ovens with added features like [FullSteam](#) or [microwave](#) so you can get one oven with does it all!

So if you fall into one of the below groups, a single oven may be your best option:

– You have a small kitchen

– You don't cook for big groups.
