

Cook salmon and cake at the same time? Find out how this is possible

Whether you're short on time or planning an elaborate dinner party, trying to get everything done one at a time in the oven can be time consuming and difficult.

Even if you plan your menu meticulously, if your oven can only cook one thing at a time it can mean a full day (or more) in the kitchen.

When you purchase a [NEFF oven](#), you're able to cut the cooking time down and cook multiple things at once thanks to NEFF's exclusive CircoTherm® function.

In other words, you can bake a cake and a piece of salmon in the same oven, at the same time, without the flavours intermingling. How? Read on to find out!

What is CircoTherm®?

[CircoTherm®](#) is a feature available in that allows you to cook on all four levels of the oven simultaneously without any of the flavours mingling. That means you can cook a piece of fresh fish and bake a batch of cookies at the same time without ruining your sweet dessert.

Don't believe us? Try baking [chocolate pear dessert cake with chocolate sauce](#) at the same time as our [baked teriyaki salmon fillets](#) – we guarantee the flavours won't mix.

How does CircoTherm® work?

Using the powerful EfficientSilentDrive motor, air is drawn in from the oven and evenly distributed between the levels. With a powerful rear wall heating element and unique fan, it has been designed to ensure optimal heat distribution throughout the oven cavity, resulting in even cooking on all levels.

Whether it's perfecting our [roast pumpkin, feta and sage quiche](#) or baking a hearty dessert for your next diner party, like our [lemon and blueberry dump cake](#), CircoTherm® enables you to cut down on time and mess and enjoy what's important – the food (and the people you're sharing it with)!

What are the other benefits of CircoTherm®?

NEFF's CircoTherm® ovens come with a PowerBoost function that can further speed up your cooking times by eliminating the need to preheat your oven. Simply prepare your food, put it in and start the oven. That's it!

Say goodbye to blind-cooking bases

If soggy bottoms plague your baking attempts, [CircoTherm® Intensive](#) has got you covered whether you're preparing a pizza or baking a pie. In fact, it can eliminate the need to blind bake your favourite pie recipes entirely! CircoTherm® Intensive uses a combination of the optimal heat distribution with bottom heat, which is ideal when you're looking for crispy bottoms from your baking. Try it when making our [delicious lemon meringue pie](#) – it won't !

Want to learn more about CircoTherm® and the [other NEFF-exclusive functions](#) available? Register your interest in a [free NEFF cooking demonstration](#). Open to new, existing and potential NEFF customers, have all your questions answered by a NEFF expert as they prepare you a delicious meal.
