

How to use The NEFF oven's automatic programs

Ingredients

Method

Struggling to get your oven settings right? Whether you're baking a cake, cooking dinner or steaming a home meal, each dish requires a unique mix of temperature, moisture and cooking time to taste it's best.

But never fear – you can prepare food very easily using the various automatic programs on your NEFF oven.

The number of automatic programs your NEFF oven has depends on if it is a steam oven or an oven with microwave functionality. For example, the NEFF FullSteam oven comes with 30 automatic programs. These operate on cycles that are pre-programmed into the oven with the correct setting and oven temperature to ensure your dish is cooked to perfection.

Some of these automatic programs will use a combination of different oven functions – so when cooking 'roast pork with cracking' your oven will use a combination of steam, CircoTherm, CircoRoasting and finally CircoRoasting with VarioSteam during the cooking cycle to ensure a cracking forms.

There's no need for you to change the settings – your oven does the thinking for you by choosing the correct setting and temperature every time.

Automatic programs available with FullSteam

Your NEFF FullSteam oven has plenty of automatic programs, from hard-boiled eggs right through to a crispy roast potatoes.

To get started, find the dish you're wanting to cook from the following categories:

- Vegetables
- Side dishes
- Poultry & Fish
- Desserts
- Specialties

Automatic programs available with VarioSteam

Unlike FullSteam cooking, VarioSteam injects steam into the oven compartment throughout the cooking process to keep your food moist. The automatic programs include mixed grain bread, whole roast chicken and

fish fillets.

To get started, find the dish you're wanting to cook from the following categories:

- Bread
- Pastries
- Meat
- Poultry
- Fish

Combination microwave automatic programs

Your combination microwave oven is also capable of utilising built-in automatic programs to make cooking easier. In addition to defrost programs, you can also cook long grain rice, frozen pizza, baked potato or chicken pieces using the automatic programs.
