

Why should you consider an induction cooktop?

Ingredients

Method

Whether you're wanting to step into the future with your cooktop or are unsure if you're ready to give up [your gas flames](#) learning more about induction cooktop benefits can help you to decide which direction is right for your home. Here's everything you need to know!

You'll need magnetic or pan material cookware to use an induction cooktop, as the cookware itself needs to conduct the heat. Although this means you can't use any old saucepan, it does mean that you get to benefit from energy efficient cooking, cleaner, safer kitchen appliances for everyday experience in the kitchen.

What is an induction cooktop?

Induction cooktops use electro-magnetic technology to transfer heat from your cooktop directly to your pan. The surface can still get hot – but with no flame it's a lot safer (especially if you have children!). The [NEFF induction cooktop](#) also has a heat retention indicator to show you when it's okay to touch.

Can I use my existing cookware with my induction cooktop?

You'll need magnetic or pan material cookware to use an induction cooktop, as the cookware itself needs to conduct the heat. Although this means you can't use any old saucepan, it does mean that you get to benefit from energy efficient, cleaner, safer experiences in the kitchen. If you're not sure whether your pans are magnetic or not – use a fridge magnet and see if it sticks to the bottom of your existing cookware. And if you do need to buy new pots or pans, [check out NEFF's accessory store](#) for induction-friendly items.

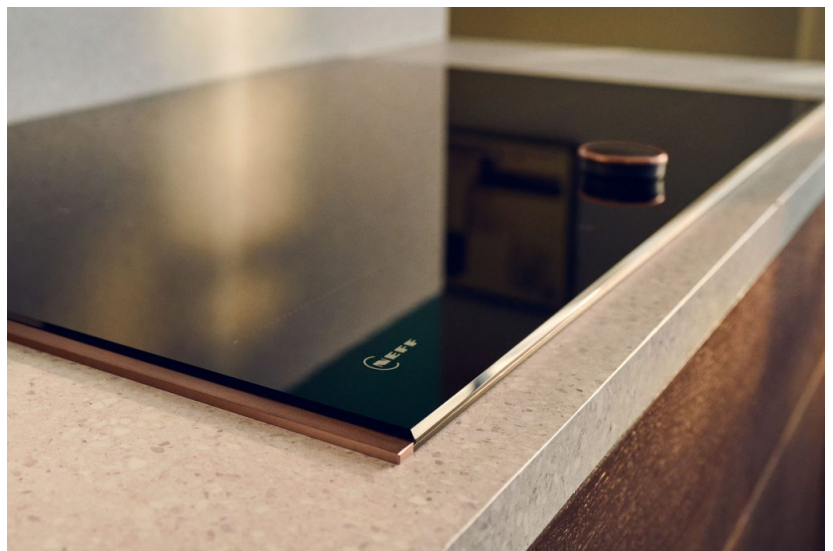

Pros of induction cooktops

1. Induction cooktops heat up a lot faster than gas cooktops

Unlike the traditional gas appliance, induction cooktops heat up your pots and pans almost instantly. This means you won't have to sit around waiting for a saucepan of water to boil for a quick weeknight pasta or for when you are melting chocolate while juggling other baking functions on the oven!

Make your own [chili oil](#) at home in under 30 minutes with the NEFF induction cooktop.

2. Induction cooktops are easier to clean

Compared to gas cooktops, induction cooktops are less of a hassle to clean because you don't have to work your way around the trivets and attempt to clean small crevices. A simple wipe with a microfiber cloth after each use and a deeper clean with the [surface cleaner](#) makes an induction cooktop a dream kitchen appliance to maintain.

3. Induction cooktops can help to improve your cooking

Because they have more intelligent, advanced technology features, induction cooktops take the stress and guesswork out of cooking. And with no flame, it's harder to burn or overcook your food.

Some of the main features of the NEFF induction cooktop include:

- Smart child safety locks to help keep little hands safe.
- Flexibility thanks to the Extended [Flex Induction function](#), which lets you position pans of any size wherever you wish on the cooktop. Simply place your cookware on the cooktop and let it detect the size and position, merging cooking zones to gain not only more depth but also width thanks to the bonus extension in the middle. This is also helpful when using oversized cookware for even heat distribution. In addition to the flexibility on the cooktop, the NEFF [Flex Design](#) induction range now lets you choose from 4 unique colours for your cooktop trims that can be changed to match your other NEFF appliances in your kitchen.
- The Power Boost function on a NEFF induction cooktop helps provide a further 50% more energy over and above the highest heating level – which helps to save you time when you're in a hurry.
- [Twist Pad Flex®](#) – Operate your cooktop with the haptical control! The magnetic, removable Twist Pad Flex® ensures precise and easy operation on your cooktop. Activate your desired cooking zone with a simple tilt and choose your desired power level. The control keeps going too – the Twist Pad Flex® can also be used to operate your oven and coffee machine!
