

THE NEFF KITCHEN

For lovers of food and NEFF appliances.

When it comes to kitchen appliances, a single feature can make a world of difference.

3 Benefits of Having a NEFF Slide&Hide® oven

Since launching its first [Slide&Hide®](#) oven in Germany more than 16 years ago, NEFF has become famous for its fully retractable door that tucks away, giving home cooks unimpeded access to their oven. This feature is unique to NEFF and perfect for people who have had their fair share of nasty burns or need a little bit of extra wiggle room to move around their kitchen.

Here's why every homecook needs a NEFF Slide&Hide® oven:

Convenient access to your oven

The NEFF Slide&Hide® feature was designed by passionate cooks who love the process of making and sharing food. They have experienced your cooking frustrations and developed a product that takes the stress out of the kitchen so you can focus on creating great food. Because the oven door disappears under the oven, you have full access to your baking environment and can baste and taste as you go. It's also helpful when you're trying to monitor your food or wipe up a nasty spill because you can get to work without dodging a hot oven door.

More space in your kitchen

While we all dream of having a big lavish kitchen with lots of room, the reality is many of us are [short on space](#). But the good news is NEFF's Slide&Hide® door helps you to optimise your kitchen space without sacrificing style or function. By fitting smoothly under the oven, the disappearing door will help you move around the kitchen with ease.

Safety first

If you've ever burnt your hand on an oven door, you are not alone. It can be difficult to remove food from the oven without grazing your arm on the way out, especially if you are carrying a heavy dish. And kids are constantly at risk when there's an oven door open. Keep your children safe and minimise your risk of getting burnt with a NEFF Slide&Hide® oven which makes it much easier to remove food once it has finished cooking. NEFF's Slide&Hide® also comes with quality safety features including a quadruple glazed CoolTouch door and an adjustable child lock to keep the kids away from the heat inside..

Best of all, there is a four year warranty on all [NEFF Slide&Hide®](#) ovens which means you can be confident that your Slide&Hide® oven will last.
