Notes

Method

Mix all the dry ingredients together so they make a paste and then rub into the whole chicken.

Select <u>CircoRoast</u> on 200°C and set the <u>MultiPoint MeatProbe</u> to 75-80°C. Insert the probe into the chicken from one breast across to the other and press start.

Cut all vegetables into 1 inch squares then place into a bowl with the olive oil, rosemary, thyme, mustard, honey and smoked paprika. Season with salt and pepper then mix. Place on a universal tray with the baking sheet underneath then put in oven underneath the chicken for the last half of the cook. This will be approximately 35-45 minutes in for a 1.2kg chicken.

Once the chicken is cooked remove from the oven and elevate the veg to level 4 and continue to cook for a further 20 minutes or until golden brown and soft.
