COOKING PASSION SINCE 1877

How to give your NEFF kitchen a seamless finish

Ingredients

Method

With NEFF's latest **Flex Design range**, you can stack multiple built-in appliances with seamless combination trims tying the kitchen's aesthetic together. A seamless stack means your NEFF appliances will work together neatly and stylishly, fitting in perfectly with the rest of your kitchen.

Read on to learn more about how Flex Design can elevate your kitchen's look and feel.

What is Flex Design?

The **NEFF Flex Design range** is an exclusive collection of appliances that come with coloured trims and handles that can help to create a seamless finish for your kitchen. With four different colours to choose from – including Brushed Bronze, Deep Black, Metallic Silver and Anthracite Grey – you're bound to find a colour that suits your kitchen's aesthetic.

What makes Flex Design so unique is that the trims come in a number of different lengths, allowing you to mix and match your NEFF appliances to suit your kitchen layout, lifestyle and cooking style.

With so many different **seamless combinations** to choose from, you can achieve cross-appliance uniformity for your cooktop, rangehood, coffee machine, oven and more.

How does Flex Design work?

To make the most of Flex Design, you'll need to invest in one of the multiple combinations that work for your set up so you can connect the two appliances seamlessly.

We have a number of Flex Design combination trims to help you create your perfect stack of NEFF appliances. Here are just some examples of how you can mix and match your appliances to suit your cooking needs:

 For those with limited space, you can combine a 45cm compact appliance, such as a **compact built-in steam oven**, with a **14cm warming drawer** for a seamless connection.

 To keep your dishes warm before a large dinner party, you can combine a **Slide & Hide® oven** with a **warming drawer** for a holistic kitchen design.

 And for those who need to double their oven space or diversify their appliances, you can effortlessly stack a **60cm oven with steam** with a **45cm compact oven with microwave function**.

As part of this range, we are also introducing the **Twist Pad Flex®**. This innovative feature allows you to control your appliances with a single handle that matches the rest of your kitchen's design. You can easily move the Twist Pad Flex® handle from your cooktop to your coffee machine to your oven without compromising any of your creations.

Note: Twist Pad Flex® is only compatible with limited NEFF oven models.

What appliances are in the new Flex Design range?

There are several appliances that are part of the new Flex Design range, which include:

- Built-in ovens, **compact ovens with microwave functions** and **Slide & Hide® ovens** for effortless stacking and cooking.
- Built-in **warming drawers** to keep your dishes warm.
- Inclined **rangehoods** to absorb unwanted smells.
- **Induction cooktops** of varying sizes.

Style inspiration with Flex Design

The new Flex Design range comes in four distinct colours, each brining a **unique style** into the kitchen.

Anthracite grey

If you like the **minimalist look**, then the anthracite grey trimmings and handles can add a subtle touch of luxury to your kitchen. Add grey cabinetry to create a holistic style.

Brushed bronze

Brushed bronze trims and handles can bring the industrial chic aesthetic to life. When you pair your bronze-trimmed appliances with **brass taps** and **cabinet handles**, you can truly create an industrial-inspired kitchen.

Metallic silver

For a **contemporary Hamptons style home**, you can't go past the timeless metallic silver trims and handles. This colour trimming and handles can complement any type of kitchen style, especially those with lighter and airer aesthetics.

Deep black

Want to create some **monochrome magic** in the kitchen? Then the deep black trims and handles on your appliances is a must. A built-in oven can create a seamless look with your black kitchen cabinetry.

Want to see the Flex Design range in person? Then **book a free product demonstration** today! Our NEFF kitchen experts will show you just how easy it is to create a seamless design within your kitchen.

About NEFF
